DETAILED ACTION

Response to Amendment

This Office Action has been issued in response to amendment filed 25 September 2008. Applicant's arguments have been carefully and fully considered and are persuasive.

The instant amendment is not fully compliant with the provisions set forth in 37 CFR 1.121. Specifically, the Examiner wishes to note that 37 CFR 1.121(b)(1)(iv) requires that, *"The text of a paragraph to be deleted must not be presented with strike-through or placed within double brackets."* However, because the instant amendment appears to be a *bona fide* attempt to advance prosecution of the instant application, and in view of compact prosecution, the amendment filed 25 September 2008 has been considered as though it was fully in compliance with 37 CFR 1.121.

Claim Status

Claims 1-10 remain pending and are ready for examination.

Allowable Subject Matter

Claims 1-10 are allowed.

The following is an Examiner's statement of reasons for allowance: the prior art made of record teaches a flash memory management method, but fails to teach the combination including the limitation of:

(Claim 1) "...wherein, if the mapping information on the data block exists in the mapping area, data is read from the data block in the alternative area, and if the

mapping information on the data block does not exist in the mapping area, data is read from the data block at the original address in the data area.”;

(Claim 5) “...wherein, if the mapping information on the data block exists in the mapping area, data is read from the data block in the alternative area, and if the mapping information on the data block does not exist in the mapping area, data is read from the data block at the original address in the data area.”;

(Claim 6) “...wherein, if the mapping information on the data block exists in the mapping area, data is read from the data block in the alternative area, and if the mapping information on the data block does not exist in the mapping area, data is read from the data block at the original address in the data area.”;

(Claim 7) “... wherein, if the mapping information on the data block exists in the mapping area, data is read from the data block in the alternative area, and if the mapping information on the data block does not exist in the mapping area, data is read from the data block at the original address in the data area.”

As dependent claims **2-4**, **8-9**, and **10**, depend from an allowable base claim; they are at least allowable for the same reasons as noted supra.

The prior art made of record, neither anticipates nor renders obvious the above-recited combinations for at least the reasons specified and as shown in Applicant's Arguments filed 9 January 2008.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
